ECOCLAD EXTERIOR CLADDING

The exterior cladding of a garden room is arguably the most important part. It protects from the outside elements and determines the overall look of the building. We always choose high quality, durable materials for our garden rooms & that is why we have chosen EcoClad for our exterior cladding. Ecoclad has a life expectancy of 25 years minimum!

Our exterior cladding is manufactured in Chile, USA & Canada, and used to clad millions of homes that are subject to extreme weather conditions. We figured if its good enough for them, its goos enough to surpass the durability needed for our UK climate.

**ENRICHED WITH WAXES & BORATES ENSURING
MAXIMUM ROT AND FUNGAL DECAY RESISTANCE**

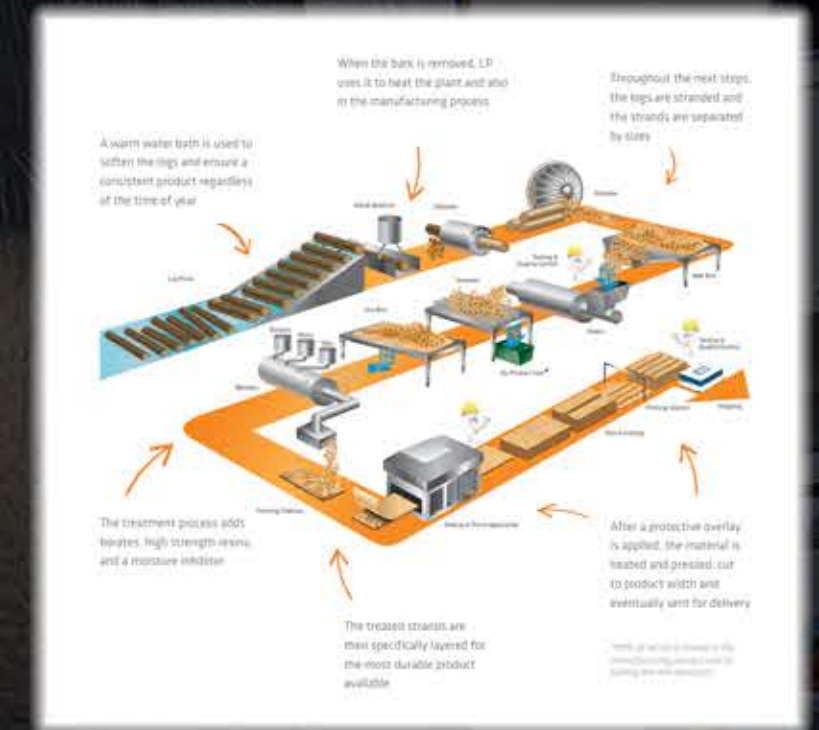

**HARDENED RESIN EXTERIOR PROVIDES A HIGH
IMPACT RESISTANCE**

**PRIMED DURING PRODUCTION FOR A DURABLE FINISH &
GIVEN 3 COATS OF PAINT BY OUR TEAMS**

**TESTED IN EXTREME WEATHER CLIMATES
IN HILO, HAWAII SINCE 1996**

TESTIMONIAL 1

“A fabulous experience with Eco Garden Studios. Everything from our first enquiry,bespoke design to delivery of the building materials and ultimate constructionwas a smooth and reassuring experience. The construction team of 3were extremely professional,polite and considerate. Their work ethic and hard graft were second to none, as were their attention to detail & craftsmanship.

Richard - 20' x 12' - Cumbria

ECOQUILT EXPERT MULTIFOIL INSULATION

Warm in winter, cool in summer. We understand that a garden room is a big investment and needs to be usable all year round, whatever the weather.

Each and every one of our garden room's floor, walls & roof is fully insulated using Ecoquilt Expert multifoil insulation, ensuring an optimal temperature is easily reached whatever the weather.

This UK manufactured multi-layered aluminium quilt helps reflect radiant energy back into the room and forms a vapour control layer which reduces the chance of condensation.

We also install a layer of EcoTec Floor Foam to the floor before the floor covering is installed improving the thermal performance of our Garden Rooms even greater whilst also adding improved acoutics and under foot comfort.

ELECTRICS

We can tailor an electrical package to suit your exact needs. We can supply and install low energy LED interior ceiling spotlights and exterior canopy spotlights. Exterior wall lights all finished in stunning brushed steel fittings.

The power sockets and switches are all included and a complimentary smart glass panel wall heater in a choice of colours will keep your new garden room toasty in the winter months. There's no limit to how many sockets you can have and we can even install an outside socket to help with garden maintenance.

All wiring is fitted concealed within the framework of the walls & roof before the interior cladding is fitted and we will even fit your tv or accessories free of charge!

When it comes to the electrical connection to your existing home power supply, we can take care of this for you subject to a site survey whether in person or via video call. We can commission & test our work & issue a certificate at time of completion. Either this or you can source their own trusted electrician.

If your looking for some additional lighting options we can install extras such as our LED feature wall or internal wall lights to create a nice subtle mood.

So whether you plan on having an office, gym or bar we are sure we can create the perfect electrical package to suit you're needs.

TESTIMONIAL 2

“ I would like to thank the company for a job very well done erecting my new garden office studio. I love it! It is completed to an extremely high standard. The installation team did an amazing job and were brilliant at clearing up after themselves. I would thoroughly recommend them to anyone looking for a garden office. 5* service from start to finish!

Samir - 22' x 14' - Coventry

TESTIMONIAL 2

BASES

Every quality Garden Room starts with a well built, long lasting base for it to sit on. Whatever ground you have where your Garden Studio will be situated we can build a bespoke base to accomodate your new building. Whether its grass, concrete or slabs we have a base solution to suit.

If you have a grass or soil area we will install galvanised steel ground screws with a life expectancy of 100 years providing a solid foundation that will last the lifetime of your Garden Room. We have a range of sizes available from 550mm to 1200mm meaning we can overcome uneven and sloped ground and create a perfectly level foundation.

If the area is hard concrete or slabs we can install treated timber posts wrapped in a damp proof membrane, waterproofing them and preventing any water contact and rot. We then secure these posts using heavy duty brackets.

Every base we install is fully insulated and sealed using Ecoquilt Expert multifoil insulation which will prevent any cold and draughts entering the building and retain the heat in winter. We use fully treated 5' x 2' timbers and joist hangers at 400mm centres ensuring zero flex. The floor of our buildings is an 18mm OSB board which is screwed to each beam locking each joist together.

We can install access steps and decking for the perfect finish.

WINDOWS & DOORS

Fully Customisable...

Because we manufacture our own buildings in our workshop we can design a building to your exact requirements. We have a huge range of uPVC & aluminium window & door choices, as well as virtually any size and specification window available.

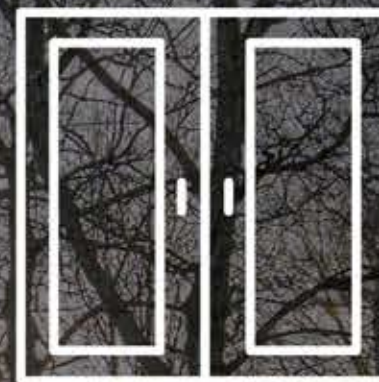

We can tailor your design to suit your garden views and interior furniture giving you a fully bespoke, personalised Garden Room.

Whether you prefer French Doors, Sliding patio doors or aluminium bi-folding doors we are confident that we can deliver a design to suit your exact needs.

We can add opening windows to allow ventilation, high level windows with offices and desks & we can even add low thresholds for easy accessibility.

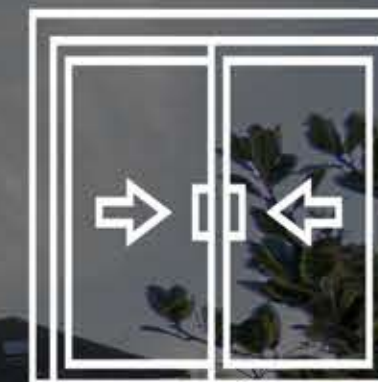

Our team will work with you to create your perfect layout & configuration.

EXTRAS

Need partitions, decking or plumbing? We can do that too!

Because we have an experienced, versatile installation team we don't need to sub contract any part of your installation. We can add a stunning decking area to compliment your EcoStudio and provide a perfect space for outside seating furniture and decoration. A step can be included to make access into your building as easy as possible.

We can install partition walls and internal doors to create seperate rooms such as a W/C or multifunctional storage, work and leisure space. We can take care or all internal plumbing work such as sinks, toilets and heaters.

COLOURS

A world of colour...

When it comes to colour choice we know each customer is different in what they like. We believe that we have the biggest choice over all other garden room providers in terms of colour choice. We do have a huge choice of standard available colours for the exterior & interior of your EcoStudio as well as windows and doors.

We can have any RAL colour matched perfectly to your liking meaning the choice is virtually endless. It's important to us that you have the freedom to customise your EcoStudio to your exact liking and are 100% satisfied with the end result.

When it comes to paint, we have tried them all & selected the best. For the exterior we use Protek and the interior Layland trade & Macpherson, both exceptional quality and guaranteed to give a long lasting durable finish.
